OFFICE OF THE MINISTER FOR L S G & P H
Date 31 5 43
No 9904

To

The Secretary to Government,
Law Department,
Bangalore

Sir,

Belur water supply - formation of the road to the pumping station - work consented to be undertaken by the Executive Engineer Hassan Division, on account of urgency

I have the honour to state that the Sanitary Engineer reports in his No 1481 dated 5th May 1943 that in spite of repeated requests by him to the Assistant Engineer, No 3 Sanitary Sub-Division, Hassan to rush through the work of formation of a road from the Electric Colony to the pumping station on the banks of the Yagachi River, connected with the Belur water supply, the work was not taken up as it was proposed by the Deputy Commissioner to have the water supply installation opened by the Minister for Revenue by about the 25th of this Month, the Sanitary Engineer has by personal discussion with the Executive Engineer obtained his consent to have the work done through the P W D agency, in time

The action taken in utilising the help of the Public Works Department in view of the urgency, could not be avoided

As the above is a deviation from the duties devolving on the Bureau of Sanitary Engineering, I request you to be so good as to obtain and convey approval of Government to the above deviation which could not be avoided on account of the urgency

A copy of letter No 1481 dated 5th May 1943 of the Sanitary Engineer is enclosed herewith for the information of Government

I have the honour to be,
Sir,
Your most obedient servant,
Director of Public Health &c

Letter No 1481 dated 5th May 1943 from the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, to the Director of Public Health in Mysore, Bangalore.

Subject - Belur water supply -- formation of the road to the pumping station

I have the honour to state that there is a provision of Rs 2163/- for the formation of a road from the Electric Colony to the pumping station on the banks of the Yagachi river. The Deputy Commissioner, Hassan District, Hassan, whom I saw on the 20th ~~March~~ of last month, stated that he is thinking of having the water supply installation which is nearing completion opened by the Minister for Revenue by about the 20th of this month. My repeated requests to the Assistant Engineer, No 3 Sanitary Subdivision, Hassan, to rush through the road work and instructions issued to him since January 1943 were not attended to and during my last inspection, it was noticed that there was no chance of getting the road work completed in time if the matter are allowed to continue in his hands. Accordingly, I discussed the matter with the Executive Engineer, Hassan Division, Hassan who was kind enough to agree to take up this work and complete the same at the sanctioned estimated rates through his own agency in time, and transfer the cost to this department for acceptance. On account of the urgency, the action taken in utilising the help of the Executive Engineer, Hassan Division, Hassan, for getting the road work completed may kindly be approved. The Assistant Engineer No 3 Sanitary Sub division, Hassan, has stated as an excuse, that he has no assistance or subordinates to get through this work since the subovverseer Mr B. Sampathiengar who was transferred to Tog has not yet been replaced. Though his complaint is ture, I feel that had the Assistant Engineer made up his mind to get through the work he could have arranged with the available staff to have got through this very important work

Bangalore, dated 4th October *1943*

To

The Secretary to Government,

Law Department, Bangalore

Sir,

Delay in the execution of the road work at the Belur Water Supply

--

With reference to your letter No L 12069/41 77-42-20 dated 14th June 1943 calling for the explanation of the Assistant Engineer, Sanitary Subdivision, No 3 Hassan as to why the work was not taken up and completed early, I have the honor to enclose herewith a copy of letter No 64 dated 18th July 1943 of the Asst Engineer furnishing the explanation, together with a copy of letter No 360 dated 16th September 1943 of the Sanitary Engineer opining that the Officer could have easily finished the road work much earlier and at least along with the construction of the pumping station I may add that I have also observed the work of this officer to be dilatory

The letter dated 6th May 1943 referred to by the Sanitary Engineer in his present letter (copy of which is sent with this letter) has already been sent to Government with this office letter No C 229-42 dated 17th May 1943 on the subject

I have the honour to be,
Sir,

Re Explanation for the delay in the execution of service road work to pump house at Belur

**

With reference to your memo No 1703 dated 21/23-6-43 calling for explanation in the above matter, I have the honour to submit the same herewith as follows -

Quotations were called for the above work on 13-12-42, but there was no response

Then with much persuasion one contractor, Mr Mumtaz Ali of Nonenarsipur, agreed to execute the work at the estimated rates on 1-3-43 The same was approved by the Sanitary Engineer Accordingly orders were issued to the Contractor to execute the work

Cont

But the contractor did not start the work A notice was issued to the contractor on 19-3-43 for which he replied on 26-3-43 that due to his ill-health, there was delay in starting the work and that he would give progress during April He contractor did not start the work in April also

Under the circumstances, the only alternative that was left to the Assistant Engineer was to start the work departmentally, as the contractor failed to execute the work After executing the or departmentally there was no subordinate to place in direct charge of the work, nor there were implements available in this subdivision

The sanctioned executive subordinates of this Subdivision are two for each district, two for Hassan District and two for Kadur District but actually there is only one for each district for the last 3 months all the subordinates transferred or left are not replaced This matter was reported to Sanitary Engineer and also brought to his notice, during his inspections, stating that works are suffering on this account For this the Sanitary Engineer expressed to do my best with the existing subordinates

orks at Belur were mostly dependent upon imported labour owing to present abnormal conditions, the labour is scattered away, and the usual labour is not available The difficulty in executing the works at present under the abnormal conditions is common with other departments also The Public Works Department had to direct labour from their other special works, and also put on a Surveyor with local knowledge in charge of this work in addition to one Surveyor of this Department, who was lately posted for this work temporarily on 5-5-43

This on account of the approved contractor failing to do the work, local labour difficulty, and enhanced present Market rates, and also for want of adequate executive subordinate staff, there was some delay in the execution of this work

In this connection, I wish to submit that for the last 15 years of my service, I have executed many works in time and I have discharged my duties to the best satisfaction of my Superior Officers and particularly at Davangere as Municipal Engineer In this case the delay is due to special circumstances stated above, for which I may kindly be pardoned

Re Delay in the execution of service road work at Belur

**

With reference to your Memo No 229-47 dated 17th June forwarding copy of letter No P 12069/41 77-42-20 dated 14th June 1943 from the Secretary to Government, Law Department, Bangalore, to you conveying approval for the service road to the Pumping Station at Belur being undertaken, as a special case, by the Public Works Department and requesting me to obtain the explanation of the Assistant Engineer, No 3 Sanitary Subdivision, Hassan, as to why the work was not taken up and completed early, etc , I have the honour to enclose herewith copy of explanatory letter No 64 dated 18th July 1943 from the Assistant Engineer, for your information As already stated in the latter part of my letter No 1481 dated 6th May 1943, the Assistant Engineer had an excuse of lack of subordinate staff, but as opined by me therein, though the complaint is somewhat true, I have felt that the Assistant Engineer could have with the available staff got through this important wor

It

It has to be stated that he has been lacking in initiative and supply contents himself by entering into laborious and dilatory correspondence with both his contractors and staff without getting into direct touch with them and overcoming difficulties in execution of works by personal contact The Supervisor, Mr B. Sampathien, ar left the subdivision in December 1942 and the Assistant Engineer could have easily finished the road work much earlier and atleast along with the construction of the pumping station He never bestowed attention on this work at all until very late He may be issued a warning and let go this time
